Protection Class Application Instructions

Instructions for reviewing completed form

Complete this application for PC 8, 8B, 9, 10, or any Split Protection Class containing X, Y, or W. Applicant should contact responding fire department personnel to provide answers for Section I. Applicant to complete Section II. Please attach internet map showing distance between location address and responding fire department.

Application must be completed in its entirety. Refer any concerns to Markel for review.

Section I:

General: Information provided in Section I should be reviewed by broker in relation to the assigned protection class. Remember that drive time is not the same as response time. For example, if the distance from fire station to location is 10 miles, roads are unpaved, and firefighters are volunteers, it would be illogical to have a 15 minute response time.

11, 12: Roads and driveway must be accessible year round. Inaccessible properties are ineligible.

13: Fire department must have access to a key or security code if property or community is gated.

14: In states where applicable, 150 feet of brush clearance is required.

Section II:

2a, b: This information should be reviewed by broker in relation to response time.

Applicant's statement:

Application must be signed and dated by both the Applicant and Producer.
